

The theme of this android application is recipe kitchen, which aims to help users search and view the recipes they need.

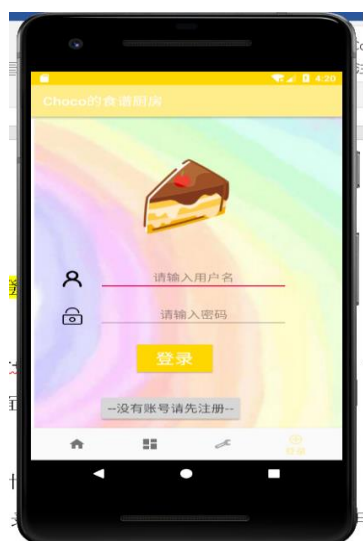

1. Registration function

New users are required to register before using the app. The registration steps are quite easy. Only name, password, and verification code are mandatory while other information is optional. There will be a prompt on the page when you register successfully. Otherwise, it will indicate the registration fails. Once users failed, they can register again.

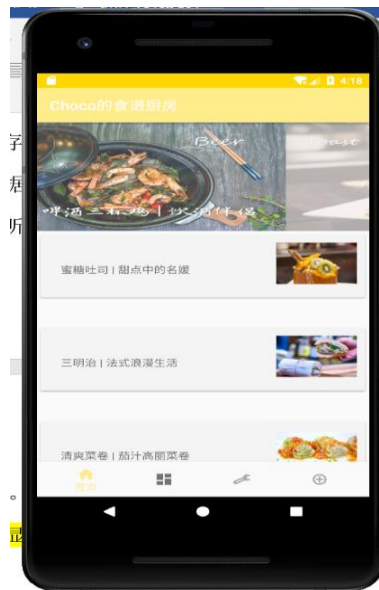

2. Login function

After successfully registering, users can login with the registered information.

3. Search function

While browsing the list of recipes on the homepage, users could click to view the recipes they are interested in.

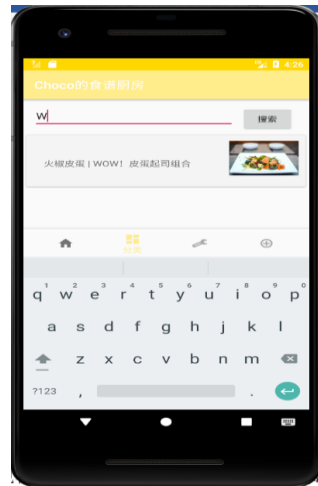

4. Before jumping into recipe link, users should ensure to enter this link on the prompt box, which would avoid clicking on the malicious link.

5. Query function

Users can enter the key words to search for the interested content.

6. Update personal information

Users could modify personal information on the setting page. Also, users can log off the account after using the account.
